Strong: JavaScript, MongoDB, PostgreSQL, Node.js, Express, React, Redux, Docker, Stata, HTML, CSS, Git, TDD
Experienced: Typescript, Python, Angular, Mocha, Chai, Socket.io, Alteryx, Tableau, VBA, Access, TEX

Experience

Consultant | Bain & Company — Munich, Germany | **09.2016 – 01.2019**
- Promoted to Senior Associate Consultant in 09.2017 and to Consultant in 01.2019
- Leveraged panel data econometrics on performance data to inform business decisions impacting 250+ technical service teams at a major telco, contributing to ~80% improved adherence to customer appointments
- Led 2 client team members in building a new reporting tool in VBA automating the work of ~5 FTE
- Built request filtering tool for account managers reducing weekly prioritisation time from ~5h to <5min
- Gave regular lectures on using Alteryx & Tableau as a lead trainer for analytics tools at Bain Munich

Emergency Medical Technician | Austrian Armed Forces — Ried, Austria | **01.2016 – 07.2016**
- Leveraged VBA and Access scripting to design a new medical records database saving the team ~5h weekly
- Completed training as an Emergency Medical Technician with highest possible distinction

Summer Consultant | Oliver Wyman — London, UK | **2015**
Summer Analyst | Compass Lexecon — London, UK | **2014**
Summer Analyst | Frontier Economics — Cologne, Germany | **2013**
Student Economist | Government Economic Service — London, UK | **2012**

Projects

Vault | Multi-currency, offline-first expense tracking app for iOS and Android — **02.2019 – present**
- Designed application-specific FOREX API and conversion algorithm to enable multi-currency expense tracking
- Implemented entity-based Redux store to manage state through a pseudo-relational database on-device
- Employed Dropbox API to provide automated backups of expense data as a unique selling point for the app
- Incorporated feedback from potential users into development of UX for initial MVP

BarQ | Real-time order management system for bars and pubs — **02.2019 – present**
- Designed architecture of core REST API and implemented real-time order queue connecting front and back-end
- Containerised core API using Docker to enable seamless collaboration between front and back-end teams
- Acted as scrum master for a team of 5 engineers, managing the product throughout the development lifecycle

Storeo | Open source e-commerce toolkit for building online storefronts — **01.2019 – 02.2019**
- Leveraged containerisation with Docker to reduce developer ramp-up time from ~6h to <5mins
- Refactored original monolith to a microservice architecture to increase modularity and separation of concerns
- Initiated continuous integration workflow by increasing test coverage and introducing automated builds

BondAlgo | Trading signal detector — **01.2018 – 06.2018**
- Leveraged concurrency and web scraping to monitor prices of 4000+ assets on the Stuttgart Stock Exchange
- Deployed Python algorithm and achieved ~5% ROI over 6 months using a low-frequency investment strategy

Otrish Pipe Calculator | Mobile-first web-app for simplified pricing of steel pipes — **09.2017 – 10.2017**
- Decreased time to complete a proposal for Otrish customers by ~90% from ~3 hours to <15 minutes
- Currently position 3 on Google searches for "rohrrechner" (pipe calculator) in Germany and Austria

Education

London School of Economics | MSc Economics, Merit (69%) — London, UK | **2014 – 2015**
- Distinction for MSc thesis involving automated collection of gasoline price data over 6 months using Python
- GMAT: 770 (Q51, V44) - 99th percentile

University of Warwick | BSc Economics, First Class (78%) — Coventry, UK | **2010 – 2014**
- Invited to present BSc thesis in Financial Econometrics at *International Conference of Undergraduate Research*
- Ranked 6th of 211 students

Yew Chung International School | IB, 43/45 (99th percentile) — Shanghai, China | **2008 – 2010**

Awards, Languages & Interests

Awards: Deutsche Bank Prize, Warwick Economics Department Prize, Cambridge Best GCSE in China Prize
Languages: fluent German, English & Italian; conversational French, Spanish & Mandarin (HSK 3 in 2010)
Interests: investing (managing own portfolio since 2014), skiing (regularly for 20 years), MOOCs
